PROFESSIONAL SUMMARY

Software Developer and IT Tutor currently pursuing a Diploma in Information Technology (Software Development) at Vaal University of Technology. Passionate about building innovative digital solutions, exploring Artificial Intelligence and machine learning and developing modern, user-friendly web and desktop applications. Interested in both frontend and backend development, with a strong focus on continuous learning, problem-solving and using technology to address real-world challenges.

Profile & Skills

Surname: Mavangwa
Names: Andzani Singh
Gender: Male
Nationality: South Africa
Driver's Licence: Code 10 (C1)
Home Language: Xitsonga
Other Language(s): English(fluent)
Address: South Africa, Limpopo, Giyani

Communication
Problem Solving
Teamwork
Time Management
Creativity and Innovation
Adaptability
Willingness to Learn
Leadership

Education

Vaal University of Technology
Diploma in Information Technology (Software Development)
Vanderbijlpark, Gauteng
Feb. 2024 – Present

Kheto Nxumayo Agricultural High School
National Senior Certificate (Matric)
Giyani, Limpopo
Nov.2023

Experience

Undergraduate Personal Tutor
Vaal University of Technology
Vanderbijlpark, Gauteng
Aug.2025 - Present

Information System

Information Systems & System Design

- Tutor students in Systems Analysis and Design.
- Assist students with system design, Data Flow Diagrams (DFDs) and Entity Relationship Diagrams (ERDs).
- Guide students in analyzing system requirements and designing information systems.
- Mentor students on academic projects, including Hospital Management Systems.

Software Development & Databases

- Tutor students in VB.NET, SQL and PL/SQL.
- Assist with SQL queries, stored procedures and database development.
- Support students with debugging, programming concepts and application development.
- Guide students through practical exercises, assignments and semester projects.

Projects

Residence Maintenance Reporting System | HTML, CSS, JavaScript, PHP, JSON May.2026 – June.2026

- Developed and deployed a full-stack website for reporting, managing, and tracking student residence maintenance issues.
- Implemented role-based access for students, maintenance staff, and administrators.
- Used PHP for backend processing and JSON for data storage and management.
- Designed a responsive interface for desktop and mobile devices.

Property Maintenance System | HTML, CSS, JavaScript, PHP, JSON Apr.2026 – June.2026

- Developed and deployed a full-stack web application for managing property-related information and operations.
- Built responsive user interfaces and implemented backend functionality using PHP.
- Used JSON for storing and managing application data.
- Designed user-friendly interfaces to simplify property management tasks

Residence Management System | HTML, CSS, JavaScript, PHP, JSON Sep.2026 – Oct.2026

- Developed and deployed a full-stack website for managing student residence applications and accommodation information.
- Implemented student registration, authentication, and application management functionality.
- Used PHP and JSON to process applications and manage residence data.
- Created a responsive interface for desktop and mobile devices

AgriScan AI – Plant Disease Detection System | Python, TensorFlow, CNN, Numpy, Deep Learning Aug.2026-Oct.2026

- Developed a Python-based AI system to detect plant diseases from leaf images.
- Built and trained a Convolutional Neural Network (CNN) model from scratch for image classification.
- Prepared and processed plant image datasets to train and evaluate the model.
- Evaluated model performance using classification metrics and visualizations.
- Applied deep learning techniques to support early plant disease identification.

Java Library Management System | Java 21, Swing, FlatLaf, NetBeans May.2026 – June.2026

- Developed a desktop application to automate library operations and reduce manual record-keeping.
- Implemented book management, including adding, editing, deleting, searching, and tracking availability.
- Built user authentication, registration, and role-based access for administrators and users.
- Implemented book borrowing, returns, and transaction history using in-memory data storage.

Certificates

IBM Skills-Build - Data Science Tools	March.2024 - March.2024
IBM Skills-Build- Cybersecurity Fundamentals	June.2024-June.2024
FNB App Academy - Full- Stack Development	May.2025-June.2025
FNB App Academy - Full- Stack App Development	July.2026 - Present

Technical Skills

Languages: Java, Python, SQL, PHP, SQL (Postgres), JavaScript, HTML, CSS, VB.Net
Frameworks & Technologies: React, Fast API, Rest API
Developer Tools: Git, GitHub, VS Code, Visual Studio, Net Beans, Note Pad ++
Databases: MySQL, PLSQL, Firebase
